Yosri Hamrouni

Full-Stack Software Engineer | Business applications with applied AI (LLM, RAG)

Nabeul, Tunisia | +216 55 397 336 | yosrihamrouni@gmail.com | github.com/yosriHamrouni | linkedin.com/in/yosri-hamrouni-498a60238
Open to full-time roles in Tunisia, France and remote | Available immediately

PROFILE

Software engineer (ESPRIT, 2026; exchange semester at CESI, France) who builds business applications end to end, from data model to interface. Final-year project: a **multi-tenant school management SaaS built on my own** (Laravel, React, TypeScript, PostgreSQL) for **5 user roles**, now **deployed, piloted with a school and handed over** to Maison du Web, with an explainable student-risk score and a **RAG assistant limited to each user's permissions**. Four internships on four stacks (Laravel, ASP.NET Core, Node.js, Spring Boot) and a machine-learning research project.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, PHP, C#, Python, SQL
Backend: Laravel, Spring Boot, Spring Security, ASP.NET Core, EF Core, Node.js, Express.js, REST APIs, JWT, RBAC, multi-tenancy
Frontend: React, Angular, Inertia.js, React Query, Tailwind CSS, Bootstrap, Angular Material, HTML5/CSS3
Databases: PostgreSQL, MySQL, SQL Server, MongoDB
AI & data: LLM integration (Ollama, OpenAI API), RAG, prompt design, explainable scoring, scikit-learn, pandas
Tools: Git/GitHub, Docker Compose, GitHub Actions, Stripe, Swagger, Postman, Linux, PlantUML, Figma, Agile/Scrum

EXPERIENCE

Maison du Web – Full-Stack Software Engineering Intern (final-year project, 6 months) Feb 2026 – Aug 2026 | Nabeul

- Built on my own a **multi-tenant SaaS** shared by several schools (Laravel, **React**, Inertia.js, **TypeScript**, PostgreSQL), deployed, piloted with a school and handed over: **9 modules** incl. schedules with **conflict detection**, grades, attendance, payments, dashboards with PDF/Excel exports.
- REST APIs and Laravel services with **per-institution data isolation** and role-based access for **5 roles** (platform admin, school admin, teacher, student, parent) through middleware and policies.
- **Explainable** student-risk score combining **5 signals** (average, absences, late arrivals, weak subjects, trend), returning its reasons and handling incomplete data; experimental Python ML service with fallback to the rules.
- **RAG assistant** on a local LLM (**Ollama**) that retrieves only the data the signed-in user may access, with a rule-based fallback. Docker, GitHub Actions (lint, tests), PlantUML, Agile with Git and Taiga.

Krenova – Software Developer Intern Jul 2025 – Aug 2025

- Built a Gleam.io-style campaign platform end to end: **React** (Tailwind, React Query) and **Node.js/Express** on MongoDB.
- **JWT** auth for campaign management and participation; social media API and **OpenAI API** integrations.

L-Mobile – Full-Stack Developer Intern Jul 2024 – Sep 2024 | Nabeul

- Rebuilt a field-service app in a **team of 3 interns**: **ASP.NET Core (.NET 8)**, EF Core, SQL Server, **React 18**.
- Owned the **Articles** module end to end (EF Core models and migrations, DTOs, REST controllers, React screens), the shared app shell and the Users feature; **resolved conflicting database migrations** when merging with a teammate's module; Scrum and code review.

VioreDigital – Web Developer Intern: hotel management web app in PHP/Laravel and MySQL Jul 2022 – Aug 2022 | Nabeul

PROJECTS

Builderz – Construction management platform (ESPRIT engineering project, built alone) Feb 2025 – May 2025

- Angular 17 front office and back office on a Java 17 / Spring Boot 3 backend (JPA, MySQL) behind an **API gateway** (Eureka discovery, Resilience4j), covering **11 modules** (client requests, tasks/kanban, stages, meetings, leave, advances, bills, offers, insurance, stock. . .).
- **JWT** / **Spring Security** role-based access; **OpenAI** analysis of project requests with a recommendation score; bill payment with **Stripe**; whole stack started with Docker Compose.

AI for pathogenic genetic variants (research, CESI, team of 2) Spring 2025 | Caen, France

- Python/scikit-learn pipeline on **64,533 ClinVar variants** (∼30,000 labelled); compared Random Forest, logistic regression and ExtraTrees: best **AUC 0.74**, class weighting raised **pathogenic recall from 0.44 to 0.67**. Report and scientific poster.

EDUCATION, CERTIFICATIONS & LANGUAGES

ESPRIT – Engineering degree in Computer Science (Génie Informatique) 2021 – 2026 | Tunis

CESI École d'Ingénieurs – Exchange semester in software engineering Feb 2025 – Jun 2025 | Caen, France

Certifications: AWS Academy Graduate – Cloud Foundations (2025) ● TOEIC 795/990 (2025) ● Cisco CCNA: SRWE ● Meta Front-End courses (Coursera, 2023) ● UX/UI Bootcamp (Space Academy, 2023)

Languages: Arabic (native) ● French (fluent) ● English (B2, TOEIC 795) **Activities:** Guitar teacher (since 2023) ● Tunisian Red Crescent volunteer (since 2019)
